COSMIX Impacts to Pikes Peak Greenway Trail in Nevada /Rockrimmon Area

Girders for the I-25 bridges over Monument Creek and the Pikes Peak Greenway Trail will be set the week of December 4, 2006, as part of the COSMIX project. The COSMIX project will be placing girders over the Trail on Wednesday, Dec. 6, through Friday, Dec. 8 from 8 a.m. to 5 p.m. Trail users can expect brief impacts of the trail when girders are being placed, some with delays up to 90 minutes.

How long will these impacts last?

When construction activities impact the trail, flaggers will assist trail users through the construction area but waits of up to ninety minutes may be necessary when girders are being placed.

How do I get around the closure?

Cyclists and pedestrians may wait or take an alternate route such as Mark Dabling Boulevard to bypass the construction zone.

All activities are subject to change and are weather and resource dependent.

Staying Informed:

visit www.cosmixproject.com, and check the 7-day outlook for up-to-date impacts (sign up on the Project Web site for E-mail Alerts announcing traffic and construction impacts)
24-hour, toll-free information line: 1-877-COSMIX1 (1-877-276-6491)
